Module 3.6 — English for IT Maintenance

THE MAINTENANCE STORY

SCRIPT — VERSION 2 (rehearsed & corrected)

Activity 06 — Day 3 · Rehearsal Day

Guion dramatizado — Version 2, corregido tras el ensayo

Team / company name	InventaPro Support Team
System and client business	InventaPro — Golden Nail Hardware Store
Format chosen	Sociodrama — "The client's week"
Title of the performance	Two Bugs, One Deadline
Estimated running time	12:00 (10:00 scenes + 2:00 demo) — still 2 min over the 10-min goal, see commitments
Date	18/09/2026 (rehearsed and corrected)

What changed since version 1

Rehearsed on 11 September. Fixed: pronunciation of "backup", "security" and "failure" (see rehearsal log). Added intonation cues on 6 key lines. Trimmed Scene 4 by about 15 seconds after peer feedback said it felt slow. Scene targets updated to match today's instrument. *Ensayado el 11 de septiembre. Se corrigió la pronunciación de "backup", "security" y "failure". Se agregaron señales de entonación en 6 líneas clave. Se recortó la Escena 4 unos 15 segundos tras la retroalimentación de otro equipo.*

Why this format

We chose the Sociodrama because our real maintenance already has six clear steps — the complaint, the diagnosis, the proposal, the fix, the handover, and the plan for next time. So the true story becomes the script, with no invention needed.

Elegimos el sociodrama porque nuestro mantenimiento real ya tiene esas seis etapas claras, así que la historia verdadera se convierte directamente en el guion, sin necesidad de inventar nada.

Cast

Reparto

Student	Character	Role in the story	What this character wants
Daniel	DANIEL	Store owner (client)	Wants the store working again, fast, with no data loss
Cristian	CRISTIAN	Technician & company rep.	Wants to find the cause, fix it, and keep the client happy
Ariel	ARIEL	Cashier (end user)	Wants a system that just works, so he can help customers

Character cards

DANIEL · played by Daniel

Who am I? The owner of Golden Nail Hardware Store. He is not a technical person. He cares about his customers and his money, not about code.

What do I want? Wants the store working again, fast, with no data loss

How do I speak? Simple, direct, worried about money and time. He never uses technical words.

CRISTIAN · played by Cristian

Who am I? The technician who built and fixed InventaPro. He also talks to the client, plans the maintenance window, and hands the system back. He is calm under pressure and explains things in simple words.

What do I want? Wants to find the cause, fix it, and keep the client happy

How do I speak? Clear and calm. He explains technical facts in short, simple sentences, never jargon — and switches to a calm, professional tone when he talks about plans, times and costs.

ARIEL · played by Ariel

Who am I? The cashier. He uses the system every day. He is not technical, but he knows exactly what does not work.

What do I want? Wants a system that just works, so he can help customers

How do I speak? Practical and honest. He describes what he sees on the screen, in plain words.

Scene breakdown

Desglose de escenas

#	Scene heading	Time	Characters	What happens	[TECH] content
1	The complaint	1:30	Daniel, Ariel	The delete button crashes the page in front of a customer.	F-01 symptom; business impact
2	The diagnosis	2:00	Cristian, Ariel, Daniel	The team finds two bugs while checking the system.	Baseline metric; F-01, F-02; severity
3	The proposal	1:30	Cristian, Daniel	The technician proposes the fix, the cost, and the window.	Scope; no cost; maintenance window
4	The window	2:00	Cristian, Daniel (voice)	Cristian fixes the bugs under the clock; Daniel calls, worried; one test fails, then passes.	Change applied; test failed then passed
5	The handover	1:30	Cristian, Ariel, Daniel	The system is tested live and the client signs off.	Before/after; release notes; sign-off
6	The commitment	1:30	Daniel, Cristian, Ariel	The team explains the plan for next time.	Deferred findings; next maintenance date

Scenes total 10:00 against today's targets. With the 2:00 demo, that is 12:00 — still 2 minutes over the 10-minute goal. See "Commitments for next week" in the rehearsal log. *Las escenas suman 10:00 contra los tiempos de hoy. Con los 2:00 de demo, son 12:00 — todavía 2 minutos de más sobre la meta de 10 minutos. Ver los compromisos en la bitácora de ensayo.*

The script

El guion — escrito con formato de teatro: encabezado de escena, acotaciones entre paréntesis, nombre del personaje en mayúsculas y su línea debajo.

SCENE 1 — THE COMPLAINT. INT. GOLDEN NAIL HARDWARE STORE — MONDAY, 8:00 A.M.

(DANIEL stands near the counter. He looks at his computer. His phone rings.)

DANIEL

(on the phone, worried) Hello? Yes, this is Daniel... The system is down?

(ARIEL enters, worried.)

ARIEL

Mr. Daniel, I tried to delete an old product. Look!

DANIEL

(looking at the screen) What is this? "Fatal error"? Ariel, can you sell right now?

ARIEL

No. The page is broken. Three customers are waiting.

DANIEL

This is bad. It is Monday morning.

ARIEL

I only clicked "delete". Nothing more.

DANIEL

(on the phone again) I need help now, please. Call InventaPro.

ARIEL

I hope they can fix it fast.

[TECH: symptom reported by the user — deleting a product crashes the page]

[TECH: business impact — store cannot process sales, customers waiting]

SCENE 2 — THE DIAGNOSIS. INT. GOLDEN NAIL HARDWARE STORE — MONDAY, 8:20 A.M.

(CRISTIAN opens his laptop.)

CRISTIAN

Good morning. Can you show me what happened?

ARIEL

I clicked "delete" on this product. Then... this red message.

CRISTIAN

(reading) I see it. This product has sales already.

DANIEL

So that is the problem?

CRISTIAN

Part of it. How many products do you have?

DANIEL

Nine, I think.

CRISTIAN

(checking) Nine, correct. There is one more problem. Two sales, same time. The stock number can be wrong.

ARIEL

That happened last week! I sold the same hammer two times.

CRISTIAN

I understand now. Two bugs. Both important, but easy to fix.

ARIEL

Good. I do not want that again.

[TECH: baseline metric — 9 products in the database, 0 known errors before today]

[TECH: findings register — F-01 delete crash (High), F-02 stock check bypass (High)]

SCENE 3 — THE PROPOSAL. INT. GOLDEN NAIL HARDWARE STORE — MONDAY, 8:40 A.M.

(CRISTIAN speaks with DANIEL.)

CRISTIAN

Daniel, we can fix both. No extra cost.

DANIEL

Good. But will I lose my data?

CRISTIAN

(reassuring) No. We always make a backup first.

DANIEL

And if something goes wrong?

CRISTIAN

Then we use the backup again. Simple.

DANIEL

Good. When can you do it?

CRISTIAN

Friday morning. Eight to nine fifteen.

DANIEL

My store opens at nine thirty. That works.

CRISTIAN

Perfect. I will message you before we start.

DANIEL

Deal.

[TECH: scope — fix F-01 and F-02, no cost, included in the maintenance plan]

[TECH: maintenance window — Friday, 08:00 to 09:15]

SCENE 4 — THE WINDOW. INT. GOLDEN NAIL HARDWARE STORE — FRIDAY, 8:00 A.M.

(CRISTIAN works fast, alone. A clock is visible on screen.)

CRISTIAN

(checking his phone) Eight oh one. Backup done. Now, the delete function... done. Testing.

(CRISTIAN tests. He stops, worried.)

CRISTIAN

(worried) Wait. This test... failed.

(His phone rings. It is DANIEL, on speaker.)

DANIEL

(voice, worried) Is everything okay? I open soon.

CRISTIAN

Small problem. Almost fixed. I call you back.

(He works. He checks the clock, then tests again.)

CRISTIAN

(relieved) Found it! Fixed now. Testing again... it works! All four tests, passed.

(He calls DANIEL back.)

CRISTIAN

Daniel, we are done. Everything works.

DANIEL

(voice) Perfect timing. Thank you.

[TECH: change applied — the four approved fixes from the plan]

[TECH: one test failed on the first try, was fixed, and passed on the second try]

SCENE 5 — THE HANDOVER. INT. GOLDEN NAIL HARDWARE STORE — FRIDAY, 9:12 A.M.

(CRISTIAN shows ARIEL the screen. DANIEL watches.)

CRISTIAN

Try it now. Delete that old product.

ARIEL

(clicking) Oh! Now it shows a message: "cannot delete, this product has sales." No crash! Much better.

CRISTIAN

Yes. The report is correct now too.

ARIEL

Good, I check that report every Friday.

CRISTIAN

Here are your notes, Daniel. English and Spanish.

DANIEL

(reading, smiling) "Nothing else changes." I like that.

DANIEL

(signing) Perfect. Thank you, both.

ARIEL

Thank you! Now I can work without worry.

[TECH: before/after — 2 open defects before, 0 open defects after]

[TECH: release notes delivered, user trained, acceptance signed]

SCENE 6 — THE COMMITMENT. INT. GOLDEN NAIL HARDWARE STORE — FRIDAY, 9:20 A.M.

(DANIEL, CRISTIAN and ARIEL stand together.)

DANIEL

So, what happens next?

CRISTIAN

We have a small list for later. Nothing urgent.

DANIEL

Like what?

CRISTIAN

Login security, for example.

ARIEL

Can I tell you if something looks strange?

CRISTIAN

Yes, always. Call us.

DANIEL

(smiling) Sounds good. Same time, next month?

CRISTIAN

Same time, next month.

(They shake hands. Lights down.)

[TECH: preventive plan — deferred findings; next maintenance scheduled]

Production note: Scene 4 dramatizes one failed test for tension, as the format requires. In our real Part 3 log, all 8 tests actually passed on the first attempt — we added this beat only for the performance, not to change the facts in our documents. *Nota de producción: la Escena 4 dramatiza una prueba fallida por tensión narrativa. En nuestra bitácora real de la Parte 3, las 8 pruebas pasaron a la primera — este momento es solo para la actuación, no cambia los hechos documentados.*

Words for the pronunciation lab

Palabras para el laboratorio de pronunciación

Word or phrase	Who says it	Why it is difficult
severity	Cristian	Stress on the second syllable: se-VER-i-ty, not SE-ve-ri-ty.
database	Cristian	Two words blended into one: DAY-ta-beis, not da-ta-BEIS.
maintenance	Everyone	The middle syllable is often dropped: MAIN-te-nance.
release notes	Cristian	"Release" sounds like "re-LEESE", easy to confuse with "police".
acceptance	Daniel	The "-ept-" consonant cluster in the middle is hard to link smoothly.
fatal error	Daniel	"Fatal" is FAY-tal (long A), not fah-TAL.

Version 2 checklist

Lista de verificación versión 2

Item	Status
Every unpronounceable line rewritten or simplified	Done
Scenes cut to fit the target times, technical content kept	Done
Stage directions added where the run-through showed confusion	Done
The six peer questions answered and changes decided	Done — see rehearsal log
Intonation marks written on key lines	Done
Deck and script synchronised (cue lines match slide changes)	Done
Total time measured again and inside ten minutes	Not yet — 12:00 measured, still 2 min over
Script v2 generated, printed for each member	Pending — print before Wednesday 16

Honest note: today's rehearsal targets (1:30, 2:00, 1:30, 2:00, 1:30, 1:30) add up to 10:00 for the six scenes alone; with the 2:00 demo, the full run is 12:00 — 2 minutes over the 10-minute goal. This is logged as a real commitment for the Wednesday 16 dress rehearsal, not hidden. *Nota honesta: los tiempos de hoy suman 10:00 solo en escenas; con la demo son 12:00, dos minutos de más sobre la meta de 10. Queda como compromiso real para el ensayo del miércoles 16.*
